# Clinical Linguistics

## CRITICAL CONCEPTS IN LINGUISTICS

Edited and with a new introduction by **Thomas W. Powell**, Louisiana State University, USA and **Martin J. Ball**, University of Louisiana at Lafayette, USA

Clinical linguistics involves the application of linguistic theories and procedures to the study, characterization, and treatment of communicative disorders. Despite its youth, this specialist area has quickly evolved into a highly productive field of inquiry with a strong international presence. The field is interdisciplinary, with relevance to theoretical and applied linguistics, speech and language therapy, psychology, and education.

The Clinical Linguistics literature has been especially eclectic, appearing in diverse scientific and professional publications. Many of these sources have limited circulation, a fact that challenges individuals and research libraries to maintain a comprehensive collection. The primary aim of this new four-volume Routledge collection is to assemble a representative library of the seminal and the best cutting-edge scholarship. Classic works, as well as state-of-the-art data-based and philosophical articles, are included.

Volume I is focused on the foundations of Clinical Linguistics, particularly its conceptual, historic, and theoretical bases; Volume II examines clinical phonetics and speech measurement, and the phonological analysis of disordered speech. Volume III, meanwhile, concentrates on Clinical Linguistics and language disorders. The final volume in the collection is organized around the educational and medical application of Clinical Linguistics, as well as emerging issues and controversies. The editors have contributed an original introduction for each volume to provide context and to identify critical concepts and associated issues. The collection is also fully indexed, making it an essential work of reference destined to be valued as a one-stop research resource.

## VOLUME I

### Part 1: Defining the Domain of Clinical Linguistics

1. David Crystal, 'The Scope of Clinical Linguistics', *Clinical Linguistics* (Springer-Verlag, 1981), pp. 1–22.
2. Raymond D. Kent, 'Developments in the Theoretical Understanding of Speech and its Disorders', in M. J. Ball and M. Duckworth (eds.), *Advances in Clinical Phonetics* (John Benjamins, 1996), pp. 1–26.
3. Paul Fletcher, 'Grammar and Language Impairment: Clinical Linguistics as Applied Linguistics', in D. Graddol and J. Swann (eds.), *Evaluating Language: British Studies in Applied Linguistics 8* (Multilingual Matters, 1994), pp. 1–14.
4. Carol A. Prutting, 'Pragmatics as Social Competence', *Journal of Speech and Hearing Disorders*, 1982, 47, 123–34.
5. Martin J. Ball, 'Is a Clinical Sociolinguistics Possible?', *Clinical Linguistics and Phonetics*, 1992, 6, 155–60.
6. Nicole Müller, 'Multilingual Communication Disorders: Exempla et Desiderata', *Journal of Multilingual Communication Disorders*, 2003, 1, 1–12.

### Part 2: Historical Bases of Clinical Linguistics

7. Alexander Melville Bell, 'Visible Speech', *Visible Speech: The Science of Universal Alphabets* (Simpkin, Marshall & Co., 1867), pp. 11–21, 35–8.
8. Edward Sapir, 'Abnormal Types of Speech in Nootka' (excerpt), *Geological Survey of Canada, Memoir 62*, Anthropological Series No. 5 (Ottawa: Government Printing Bureau, 1915).
9. Roman Jakobson, 'Foundation of the Structural Laws', *Child Language, Aphasia and Language Universals* (Mouton, 1941), pp. 67–91.
10. Roman Jakobson, 'Aphasia as a Linguistic Topic', *Studies on Child Language and Aphasia* (Mouton, 1955), pp. 37–48.
11. Hide Helen Shohara and Clara Hanson, 'Palatography as an Aid to the Improvement of Articulatory Movements', *Journal of Speech Disorders*, 1941, 6, 115–24.
12. William Haas, 'Phonological Analysis of a Case of Dyslalia', *Journal of Speech and Hearing Disorders*, 1963, 28, 239–46.

### Part 3: The Role of Linguistic Theory

13. David Crystal, 'Towards a "Bucket" Theory of Language Disability: Taking Account of Interaction Between Linguistic Levels', *Clinical Linguistics and Phonetics*, 1987, 1, 7–22.
14. Harald Clahsen, 'Learnability Theory and the Acquisition of Grammar', *Child Language and Developmental Dysphasia* (John Benjamins, 1991), pp. 223–34.
15. Yosef Grodzinsky, 'Unifying the Various Language-related Sciences: Aphasic Syndromes and Grammatical Theory', in M. J. Ball (ed.), *Theoretical Linguistics and Disordered Language* (Croom Helm, 1988), pp. 20–30.
16. Lewis P. Shapiro and Cynthia K. Thompson, 'The Use of Linguistic Theory as a Framework for Treatment Studies in Aphasia', *Clinical Aphasiology*, 1994, 22, 291–305.
17. Michael R. Perkins, 'The Scope of Pragmatic Disability: A Cognitive Approach', in N. Müller (ed.), *Pragmatics in Speech and Language Pathology* (John Benjamins, 2000), pp. 7–28.
18. Patricia Jane Donegan and David Stampe, 'The Study of Natural Phonology', in D. A. Dinnsen (ed.), *Current Approaches to Phonological Theory* (Indiana University Press, 1979), pp. 126–73.
19. Daniel A. Dinnsen, 'Methods and Empirical Issues in Analyzing Functional Misarticulation', in M. Elbert, D. A. Dinnsen, and G. Weismer (eds.), *Phonological Theory and the Misarticulating Child* (ASHA Monograph 22) (ASHA, 1984), pp. 5–17.
20. Barbara Bernhardt and John Gilbert, 'Applying Linguistic Theory to Speech-language Pathology: The Case for Nonlinear Phonology', *Clinical Linguistics and Phonetics*, 1992, 6, 123–45.
21. Yishai Tobin, 'Phonology as Human Behavior: Theoretical Implications and Cognitive and Clinical Applications', in E. Fava (ed.), *Clinical Linguistics: Theory and Applications in Speech Pathology and Therapy* (John Benjamins, 2002), pp. 3–22.
22. Judith A. Gierut and Michele L. Morrisette, 'The Clinical Significance of Optimality Theory for Phonological Disorders', *Topics in Language Disorders*, 2005, 25, 266–80.

## VOLUME II

### Part 4: Clinical Phonetics

23. Martin Duckworth et al., 'Extensions to the International Phonetic Alphabet for the Transcription of Atypical Speech', *Clinical Linguistics and Phonetics*, 1990, 4, 273–83.
24. Martin J. Ball and Joan Rahilly, 'Transcribing Disordered Speech: The Segmental and Prosodic Layers', *Clinical Linguistics and Phonetics*, 2002, 16, 329–44.
25. H. Amarosa et al., 'Transcribing Phonetic Detail in the Speech of Unintelligible Children: A Comparison of Procedures', *British Journal of Disorders of Communication*, 1985, 20, 281–7.
26. Lawrence D. Shriberg, Joan Kwiatkowski, and Kit Hoffman, 'A Procedure for Phonetic Transcription by Consensus', *Journal of Speech and Hearing Research*, 1984, 27, 456–65.
27. Martin J. Ball et al., 'Non-Segmental Aspects of Disordered Speech: Developments in Transcription', *Clinical Linguistics and Phonetics*, 1994, 8, 67–83.
28. Bill Wells and Sue Peppé, 'Intonation Abilities of Children with Speech and Language Impairments', *Journal of Speech, Language, and Hearing Research*, 2003, 46, 5–20.
29. Sara J. Howard, 'Articulatory Constraints on a Phonological System: A Case Study of Cleft Palate Speech', *Clinical Linguistics and Phonetics*, 1993, 7, 299–317.

### Part 5: Speech Measurement and Instrumentation

30. Raymond D. Kent, 'Intelligibility in Speech Disorders', *Intelligibility of Speech Disorders* (John Benjamins, 1992), pp. 1–10.
31. Raymond D. Kent, Giuliana Miolo, and Suzi Bloedel, 'The Intelligibility of Children's Speech: A Review of Evaluation Procedures', *American Journal of Speech-Language Pathology*, 1994, 3, 2, 81–95.
32. William J. Hardcastle and Fiona E. Gibbon, 'Electropalatography as a Research and Clinical Tool: 30 Years On', in W. J. Hardcastle and J. M. Beck (eds.), *A Figure of Speech: A Festschrift for John Laver* (Lawrence Erlbaum Associates, 2005), pp. 39–60.
33. Sharynne McLeod and Jeff Searl, 'Adaptation to an Electropalatograph Palate: Acoustic, Impressionistic, and Perceptual Data', *American Journal of Speech-Language Pathology*, 2006, 15, 192–206.
34. Bruce E. Murdoch et al., 'Introducing the Pressure-Sensing Palatograph: The Next Frontier in Electropalatography', *Clinical Linguistics and Phonetics*, 2004, 18, 433–45.
35. R. Morris and W. Brown, Jr., 'Comparison of Various Automatic Means for Measuring Mean Fundamental Frequency', *Journal of Voice*, 1996, 10, 159–65.
36. P. H. Dejonckere et al., 'Differentiated Perceptual Evaluation of Pathological Voice Quality: Reliability and Correlations with Acoustic Measurements', *Revue de Laryngologie, Otologie, Rhinologie*, 1996, 117, 3, 219–24.
37. Gary Weismer, Daniel A. Dinnsen, and Mary Elbert, 'A Study of the Voicing Distinction Associated with Omitted, Word-Final Stops', *Journal of Speech and Hearing Disorders*, 1981, 46, 320–8.
38. Tim Bressmann, 'Comparison of Nasalance Scores Obtained with the Nasometer, the NasalView, and the OroNasal System', *The Cleft Palate-Craniofacial Journal*, 2005, 42, 423–33.

### Part 6: Clinical Phonology

39. Pamela Grunwell, 'The Development of Phonology: A Descriptive Profile', *First Language*, 1981, 2, 161–91.
40. David Ingram, 'The Nature of Deviant Phonology', *Phonological Disability in Children* (Edward Arnold, 1976), pp. 98–129.
41. Stephen Camarata and Jack Gandour, 'On Describing Idiosyncratic Phonologic Systems', *Journal of Speech and Hearing Disorders*, 1984, 49, 262–6.
42. Daniel A. Dinnsen et al., 'Some Constraints on Functionally Disordered Phonology: Phonetic Inventories and Phonotactics', *Journal of Speech and Hearing Research*, 1990, 33, 28–37.
43. Steven B. Chin and Daniel A. Dinnsen, 'Feature Geometry in Disordered Phonologies', *Clinical Linguistics and Phonetics*, 1991, 5, 329–37.
44. John Harris, Jocelyne Watson, and Sally Bates, 'Prosody and Melody in Vowel Disorder', *Journal of Linguistics*, 1999, 35, 489–525.

VOLUME III

Part 7: Developmental Disorders of Language

45. Laurence B. Leonard, 'Specific Language Impairment: Characterizing the Deficit', in Y. Levy and J. Schaeffer (eds.), *Language Competence Across Populations* (Lawrence Erlbaum Associates, 2003), pp. 209–31.
46. Heather K. J. van der Lely, 'Domain-Specific Cognitive Systems: Insight from Grammatical-SLI', *Trends in Cognitive Sciences*, 2005, 9, 2, 53–9.
